Simple solutions to keep you moving

Welcome to GEMM

GEMM empowers healthcare providers to deliver the highest quality of care at lower costs.

GEMM enables your practice to become virtually paperless which is more secure, economical and environmentally responsible.

GEMM enables healthcare providers to manage the essential elements of a modern practice via the following features:

- Patient Demographic Management
- Patient Encounter Scheduling
- Patient Encounter and Claim Management
- Claim Scrubbing and Electronic Submission
- Custom Encounter Level Health Templates
- Custom Patient Level Health Templates
- Electronic prescription provider integration
- Patient, Encounter and Financial Reporting
- Patient, Encounter, and System Level Document & Image Management
- Personalized consult letters with fax and email integrated
- Integration with voice recognition software
- HIPAA Compliant and 100% Web Based

Reasons For GEMM

GEMM is ECONOMICAL

Compared to other EHR systems, GEMM is the most cost efficient to purchase, own, and maintain. For a manageable setup and monthly subscription fee, your practice will be up and running quickly. All of the costs associated with traditional systems like file servers, licensing, support and maintenance are included in the GEMM monthly subscription.

GEMM is FLEXIBLE & CUSTOM

We will make changes and adjustments to GEMM to ensure you have a solution that works for your practice at no added cost and with no questions asked.

GEMM is MANAGED, SECURE & RELIABLE

We are partnered with **XO Communications**(www.xo.com) for all of our network and data management needs. GEMM resides in an XO certified data center within the heart of the Chicago Financial District on a HIPPA compliant, 128bit SSL encrypted network.

GEMM is RESPONSIBLE

Making the decision to implement GEMM is environmentally responsible as your practice will become more paperless and utilize our server resources instead of purchasing your own.

Benefits of a Web Based System Managed in a Certified Data Center

Stellar Security

In the case of a disaster or power outage, your system will be available and your data will be secure if it is stored in a certified data center.

Cost Effective

- No server hardware or software needs to be installed at your site because web based solutions only require a web browser and internet connection.
- Internet technology is universal and increasingly more secure making access to your system from anywhere on any PC equipment economical and safe.

Time Efficient

- Staff can learn and use web based software more quickly because they are already familiar with similar technology from using the internet.
- Lost staff time due to software problems is reduced because issues can be identified and fixed remotely.
- Medical professionals are better connected than ever both in and out of the office.
- Internet technology is easier to adapt and benefits from the constantly improving resource of web based solutions.

Implementation & Customer Service

Implementation & Training

Precision staff will work with your practice on implementing all facets of GEMM from data conversion to LAN configuration. We will get you up and running on GEMM in the most efficient and effective manner.

Training your medical professionals on GEMM is facilitated through our on-site implementation professionals, training manuals, Camtasia movies within GEMM and web seminars.

Customer Service & Support

At Precision, next to security, there is nothing more important than Customer Service and Support.

In order to ensure we are always responding properly to your needs, you will be assigned to a single member of our support staff. That Precision staff member will be on call and available 24/7/365 and will always be familiar with your account history.

Whether you are calling us for support or just a simple question, you will always speak with someone familiar with your account and capable of assisting you.

We respond immediately to your needs.

Medical Billing Options

GEMM is integrated with an electronic claims processing system that has been successfully serving the healthcare community for more than a decade. Some of the features include:

- Electronic submission of claims in ANSI-837 (HIPAA) format
- Electronic remittance translation, reports, and data export to accounting systems
- Comprehensive real-time claims editing minimizes rejected claims
- Data driven field-level edit validation provides immediate user feedback
- Automatic code validation (diagnosis, procedure, etc.)
- Detailed claim import & edit validation error reporting
- Context-sensitive pop-up selection lists speed claim entry and promote accuracy
- Maintains claim payment history
- Unattended scheduling of claims activities
- Ongoing maintenance, updates and enhancements

PRINTLINK is a data import extension that GEMM uses to interface with electronic claims processing systems. It provides the capability to automatically translate and import claims data into most electronic claims processing systems from a Text Delimited file created in GEMM.

We will also modify GEMM to work with any billing company or electronic claims processing system of your requirement.

History of GEMM

Designed by clinicians, for clinicians

GEMM was originally designed for a practice specializing in Obstetrics/Gynecology and Reproductive Endocrinology in Chicago, Illinois. They had a vision of a simple to learn, highly secure, web-based Practice Management & EHR system custom tailored to how their practice operates.

Over the past several years, GEMM has been perfected for the purpose of enabling multiple physician, multiple facility medical practices with a custom fit software solution.

GEMM is completely web based enabling practices to manage and view their data anywhere, anytime, securely with low-cost PC hardware and a basic connection to the internet.

Every GEMM feature, from the EHR encounter templates to the scheduling module, can and will be custom tailored to work for your practice.

Our willingness to customize GEMM for your needs along with our dedication to stellar customer service is what distinguishes us from our competitors.
